

碳酸饮料灌装设备

Automatic DXGF Series Carbonated Beverage Filling Machine

该设备主要用于碳酸饮料生产线，采用PLC控制机器运行。进瓶段采用风道或者螺杆输送系统，出瓶段采用链板输送系统，速度可调节，与主机变频器配合。该设备适用于瓶装含气苏打水，碳酸饮料等产品，以500ml为例生产能力从4000瓶/时到36000瓶/时。

This machine is mainly used in carbonated beverage production line. It adopts PLC to control the whole machine operation. The air conveyor or screw unit is used in the inlet part and the chain conveying system is used in the outlet part. The speed can be adjusted and cooperated with the main inverter.

This machine is suitable for bottled soda water, carbonated beverage product, etc with production capacity ranges from 4,000BPH to 36,000BPH based on 500ml volume.
